

Module 1: Topic 2 Lesson 2 Assignment—Rising, Running, Stepping, Scaling

VOCABULARY----For questions 1-2, complete the following sentences with the correct term. Use your book to help you.

- A DILATION with a scale factor greater than 1 is an enlargement.
- A DILATION with a scale factor between 0 and 1 is a reduction.

RATIO:

NEW
ORIGINAL

PRACTICE

Classify the following scale factors as Reductions or Enlargements or Neither.

3.5, 2/5, 1, 4/3, 0.6, 5/8, 7

REDUCTION	ENLARGEMENT	NEITHER
$2/5, 0.6, 5/8$	$3.5, 4/3, 7$	1

For questions 1-3, Dilate the triangle using the scale factor given and using the origin as the center of dilation.

1. $k=2$

ENLARGEMENT or REDUCTION

$A(1,1) \times 2 \rightarrow A'(2,2)$
 $B(2,-1) \rightarrow B'(4,-2)$
 $C(-2,0) \rightarrow C'(-4,0)$

2. $k=1/4$

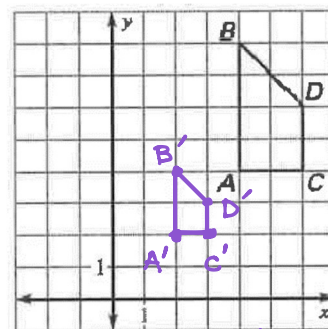

ENLARGEMENT or REDUCTION

$A(0,4) \div 4 \rightarrow A'(0,1)$
 $B(4,-4) \div 4 \rightarrow B'(1,-1)$
 $C(-4,-4) \div 4 \rightarrow C'(-1,-1)$

3. $k=1/2$

ENLARGEMENT or REDUCTION

$A(4,4) \div 2 \rightarrow A'(2,2)$
 $B(4,8) \div 2 \rightarrow B'(2,4)$
 $C(6,4) \div 2 \rightarrow C'(3,2)$
 $D(6,6) \div 2 \rightarrow D'(3,3)$

4. Determine the scale factor of the dilation.

$A(7, -3) \xrightarrow{\times 4} A'(28, -12)$

$\frac{28}{7} = 4$

Scale Factor: 4

5. Determine the scale factor of the dilation.

$Z(0, 12) \xrightarrow{\div 2} Z'(0, 6)$

$\frac{6}{12} = \frac{1}{2}$

Scale Factor: $\frac{1}{2}$

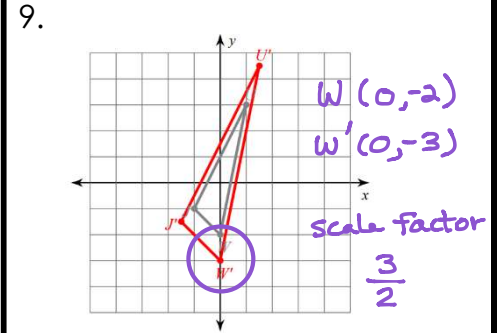

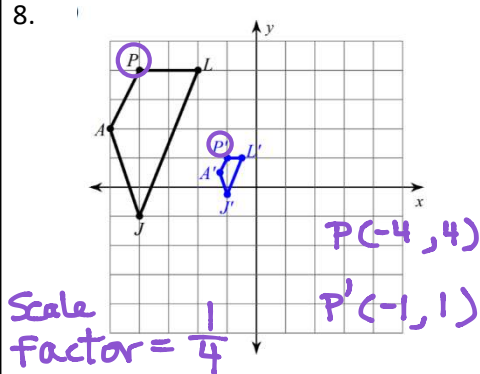

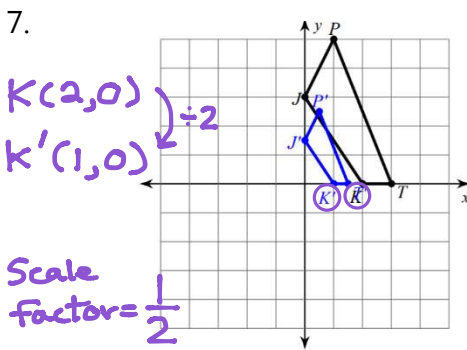

6. Determine the scale factor of the dilation.

$A(-12, 4) \xrightarrow{\times \frac{3}{2}} A'(-18, 6)$

$\frac{6}{4} = \frac{3}{2}$

Scale Factor: $\frac{3}{2}$

Given the following images, determine the scale factor used to graph the coordinates.

- Are these two figures congruent? How do you know?
Not congruent. They are not the same size.
 - Are these two figures similar? How do you know?
Yes similar. They only have the same shape, different size.
 - Describe the Dilation that occurred to map quadrilateral DMNP onto quadrilateral D'M'N'P'.
- $D(2,2) \rightarrow D'(4,4)$ Dilated by a scale factor of 2.
 $\times 2$

11a. Dilate $\triangle ABC$ by a scale factor of $\frac{1}{3}$.

$\div 3$

Pre-Image	Image
A (6, -3)	A' (2, -1)
B (9, 5)	B' (3, $\frac{5}{3}$)
C (5, 6)	C' ($\frac{5}{3}$, 2)

Rule: $(x,y) \rightarrow (\frac{x}{3}, \frac{y}{3})$

b. Dilate $\triangle ABC$ by a scale factor of 7.

$\times 7$

Pre-Image	Image
A (6, -3)	A' (42, -21)
B (8, 1)	B' (56, 7)
C (-4, 9)	C' (-28, 63)

Rule: $(x,y) \rightarrow (7x, 7y)$

c. Dilate $\triangle ABC$ by a scale factor of $\frac{2}{3}$.

$\times 2, \div 3$

Pre-Image	Image
A (6, -3)	A' (4, -2)
B (12, 9)	B' (8, 6)
C (3, -15)	C' (2, -10)

Rule: $(x,y) \rightarrow (\frac{2}{3}x, \frac{2}{3}y)$

b. Dilate $\triangle ABC$ by a scale factor of 4.

$\times 4$

Pre-Image	Image
A (6, -1)	A' (24, -4)
B (7, -5)	B' (28, -20)
C (5, 2)	C' (20, 8)

Rule: $(x,y) \rightarrow (4x, 4y)$

REVIEW

12. A line segment is dilated with center of dilation at the origin. If $UE = 12\text{cm}$ and $U'E' = 10\text{cm}$, what is the scale factor?

$$\frac{\text{new}}{\text{original}} = \frac{U'E'}{UE} = \frac{10}{12} = \frac{5}{6}$$

13. What are the coordinates of the image if the quadrilateral is translated 4 units to the right and 3 units down.

$+4$ -3

Pre-Image	Image
A (-6, 2)	A' (-2, -1)
B (-5, 3)	B' (-1, 0)
C (7, 3)	C' (11, 0)
D (0, -4)	D' (4, -7)

RULE: $(x,y) \rightarrow (x+4, y-3)$
